

Stock Transfer

in Procurement Process

SAP S/4HANA Sourcing and Procurement (Configuration and End-User)

Business Scenario

- Your company wants to transfer or transport the stock during Production according to the requirement and available quantity to reduce the inventory carrying cost. The transfer posting is made in between:
 - Storage location to storage location
 - Plant to Plant
 - Plant to Plant (Remove from one Storage location) and (Place in another Storage location)
 - Stock Transport Order from one Plant to another Plant
 - Stock Transfer from One Company code Plant to another Company code Plant

Stock Transfer

- There are two different ways to transfer the stock:
 - One-step stock transfer
 - Two-step stock transfer

One-Step Stock Transfer

- In one-step stock transfer, a single transaction posts results in goods issue (from the issuing location) and goods receipt (into the receiving location)
- **Transfer Posting from one Storage location to another Storage location (One step)** – Movement type: 311
- **Transfer Posting from Plant to Plant (One step)** – Movement type: 301
 - Note: Stock transfer between two different plants will create an accounting document if the valuation area is at the plant level

Two-Step Stock Transfer

- In two-step stock transfer, goods are issued from the one issuing point. The stock will remain in transit until the goods are receiving at the receiving point
- The two-step procedure is used for transferring stock between two different plants in different locations
- Stock valuation takes place if the valuation area is at the Plant level
- The material on the road is managed in the stock in transit of the Receiving plant and will be responsible for any damage of goods during transit
- If the goods are scrapped, then this will be a loss to the Receiving plant
- The material on the road is part of the valued stock of the Shipping plant
- **Transfer Posting from Plant to Plant – Remove from Storage location (Two step)**
 - Movement type: 303
 - Display Stock Overview: T-code: MMBE
- **Transfer Posting from Plant to Plant – Place in Storage location (Two step) –**
 - Movement type: 305

Stock Transport Orders in Procurement Process

SAP S/4HANA Sourcing and Procurement (Configuration and End-User)

Stock Transport Orders

- Stock Transport Orders are used to transfer the stocks/materials from one Plant to another Plant as the Issuing Plant can be a Procurement Plant
- The delivery costs can also be added in a STO
- STOs can be created through One-step or Two-step procedures
- **Transaction code:** ME21N ; **Document Type:** UB; **Item category:** U
- **Post the Goods issue from the Supplying Plant** – T-code: MIGO (Movement type: 351)
 - Accounting document is generated
 - **Display Stock Overview:** T-code: MMBE
 - **Stock in Transit:** T-code: MB5T
- **Post the Goods receipt at the Receiving Plant** – T-code: MIGO (Movement type: 101)
