Talent Acquisition Team

PwC Bangladesh

Dear Sir,

I am writing to express my interest in the SAP-related role at PwC Bangladesh. My background in accounting and progress towards becoming a CA have fueled my interest in expanding my knowledge of SAP S/4HANA. I have actively invested in self-learning and online courses to gain a comprehensive understanding of SAP S/4HANA Finance and Controlling.

**SAP S/4HANA (Understanding through self-learning, Udemy and LinkedIn Learning courses by Deloitte):**

- **Finance & Controlling (Configuration & End User):** This in-depth knowledge allows me to navigate the configuration and user interface for financial and controlling functions within SAP S/4HANA.
- **Sourcing & Procurement (MM) (Configuration & End User):** My understanding of this module equips me to handle configuration and user tasks related to materials management and procurement processes.
- **SAP S/4HANA: Beyond the Basics:** This additional course expands my knowledge beyond the fundamental functionalities of SAP S/4HANA.
- **SAP Financials Essential Training:** This focused training further strengthens my grasp of financial processes within the SAP ecosystem.
- **SAP CO - Product Costing S4HANA:** My proficiency in this module enables me to understand and manage product costing methodologies within SAP S/4HANA.

**Additional Exposure (through financial auditor role):**

- **SAP Product Costing Mechanism in MM Module:** Through financial audits, I gained practical experience with product costing mechanisms within the Materials Management module.
- **Hands-on End User Experience in FI Module:** My financial audit experience provided me with valuable hands-on exposure to the FI (Financial Accounting) module from a user's perspective.

**Other Technical Skills:**

- **Advanced MS Excel:** My advanced skills in Excel enable me to manipulate, analyze, and visualize data efficiently.
- **Python & R for Data Science (including SQL):** My proficiency in Python, R, and SQL empowers me to perform data analysis, manipulation, visualization, and retrieval from databases.

Despite the lack of direct implementation experience, I am a fast learner and can quickly grasp new concepts. My experience in financial audits provided valuable hands-on exposure to specific SAP FI and MM modules, demonstrating my ability to apply my knowledge in a practical setting. I am eager to contribute my skills and knowledge to an SAP-related role and continuously learn and grow in this domain.

Warm Regards,  
Saklayen Ahmed
