

Physical Access and environmental controls

Study online at https://quizlet.com/_97zob6

1. An alternative power supply.	What is the most effective control to protect against the long-term unavailability of electrical power?
2. A power line conditioner.	What is the most effective control to protect against the short-term reduction in electrical power?
3. A surge device.	What is the most effective control to protect against a high-voltage power burst?
4. Suffocation in a closed room (both carbon dioxide and Halon gas reduce the oxygen in the atmosphere).	What is the risk of carbon dioxide and Halon gas?
5. Escorting visitors.	What is the most effective control over visitors?
6. Safety of power and data cables (the floor is raised to accommodate the ventilation system, power, and data cables underneath the floor, thus protecting them from various risks and events).	What is the objective of having a raised floor in a computer room?
7. FM-200.	What is the safest gas to be used as a fire extinguisher?
