

*My career objective is to become a leading Investment/ Financial/ Portfolio Adviser with great intellectual resources and skills. I work as a financial analyst in Group financial reporting, with Credit Suisse (Pune-India) since 2016.*

*I come from a humble background where my family worked extremely hard to provide me with the opportunity to pursue Chartered Accountancy course along with graduation. I've been a consistent performer throughout my education and always featured among the brightest minds despite having limited resources. After landing a job, I continued with my ambition to gain knowledge in the finance world by completing Cost Management Accountant and Company Secretary courses. I keep myself up-to-date with the Finance and investment-related subjects available on my organisation's portal and from other open sources. My friends and I have formed a small financial advisory forum where we conduct knowledge sharing sessions and help the local community and small businesses manage their finances.*

*I want to become part of a CFA charter which is an internationally respected qualification, with its members driving the development of capital markets and spearheading development projects. The distinguishing knowledge of CFA shall broaden my scope to provide investment assistance to the community and fulfil my aspiration to become a part of front-end Investment/Private Banking and Wealth Management.*

*The CFA knowledge will lead me to become a capital planner or business controller in the near future. The Wisdom, standards and ethics imbibed in CFA will help me become a better manager and leader in fostering an enabling environment for investing. The expertise and skills acquired will result in more effective and efficient performance for my current/future organisation and also financial stability to my profile which will help me to serve my dependent parents and grandmother.*

*My determination accompanied with CFA Access scholarship would help me achieve the charter by the age of 28 (currently 25) as I would otherwise spend a long period saving up for the exam fees due to my current financial status (as my present employer don't fund CFA course for my current profile).*

*Hence I request you to sponsor my certification through scholarship and help me become the representative of the CFA society in India so that I can get a chance to help build this community economically stronger with my skills and integrity. Thank you for your valuable time to review my application*
